SNLP 2020 - Lab Session 03

Maximilian Gutsche

Seminar für Sprachwissenschaften
University of Tübingen

29.05.2020

Today's plan

- review assignment 02
- introduction to assignment 03
- introduction to working on a server

Working on the SfS server

What we need:

- uni tuebingen VPN (how to set up the VPN: https://uni-tuebingen.de/en/facilities/zentrum-fuer-datenverarbeitung/services/network-services/network-access/remote-access-vpn)
- SSH client (available natively on Linux, MacOS and Windows 10)
- SfS server url: urobe.sfs.uni-tuebingen.de
- login data for the SfS server (username, password) was given to you by Mr. Saile (saile@sfs.uni-tuebingen.de)
- screen for keeping a process alive after logging out

Working with screen - basic commands

- invoke screen with: `screen`
- list currently running screen sessions with: `screen -ls`
- invoke and name your screen session wit
  `screen -S <screen name>`
- reattach to a screen with: `screen -R` or
  `-r [screen name | screen process number]`
- use `pkill screen` to shut down screen after you are done

Working with screen - short cuts

When in a screen use the following shortcuts

short cut	action
Ctrl+a d	detach from the screen session
Ctrl+a c	create a new window
Ctrl+a w	list all windows in this session
Ctrl+a n	go to next window

Questions...?

Feel free to ask questions, now or at any time.

Thank you for your attention!
